Central Org.  
or City Office

700 Pol Ltr of 25 June  
Scientology July VAD 13  
~~CONFIDENTIAL~~

An International Objective  
for Scientists only,  
(This Pol Ltr is ~~Confidential~~.)

The attached plan is ~~not~~ <sup>however</sup>  
BPI ~~Confidential~~ when

republican. The attached  
to the public or Scientology magazines  
plan, do not publish

this covering policy  
letter.)

When we were attached  
in January for using S-

(2)

meters, I ~~spend~~  
~~research~~ adopted for us  
a 2 part policy:

(1) To hold the line  
legally and win in  
courts where possible  
but in no event to  
lose ground;

(2) To speed up  
research; by passing  
clear and definite clear  
as objectives, abandoning  
work on the technology, <sup>that give</sup> ~~grow~~  
interim states and

misses &  
technical  
B1

3

Report to  
International

concentrating on the attainment by auditing of the state of P.T. as the best <sup>forward</sup> answer to our difficulties.

In part one of this programme, we are succeeding easily. But it is only short term and world deterioration is accelerating.

In part two we have achieved the

technology necessary  
 by an incredible speed  
 up and gain. We now  
 have O.T. in direct  
 and real sight with  
 only a few hundred hours  
 of actual <sup>skilled</sup> ~~actual~~ <sup>auditory</sup>  
<sup>VENING</sup> intervening. This is an  
 astonishing break  
 through, a real by-the-  
 boot-straps necessity  
 level research sprint.

~~It~~ We are then only

(5)  
months away from  
having O.T.s, a year  
at the most.

No Scientist  
need be told what  
that means.

This <sup>fact</sup> enters ~~us~~ us  
upon forward planning.  
The trouble with O.T.s  
in the past has only  
been lack of cooperation  
and a cautiously  
agreed upon objective

(6)

Without these O.V.s  
eventually fall prey  
again to smaller  
beings with bigger  
organization skill.

O.V. is an unstable  
state only when

O.V.s are not

cooperating with O.V.s

but each one going his  
own way in the strong

but factions believe  
he can single-handedly

(7.)  
survive. The proof is,  
O.V.s have not  
survived as O.V.s  
Whenever this super-  
individuation collided  
with <sup>the</sup> super organization  
of weaker beings. The  
answer is to remain  
organized, with mutual  
assistance and  
integrity and not  
lose touch with or  
responsibility for all

(8)  
Levels of life forms  
and societies.

This means that  
programmes for such  
a agreement must be  
offered.

The first step is to  
prevent atomic war  
and planetary chaos  
and to utilize Earth  
as a rehabilitation  
centre since it has  
already had the

(9)

Technology established here. A second step

~~If a number~~  
following, after would  
be to establish

units not unlike

central organizations,  
~~or~~ nearby systems.

No real conflict  
with ~~other~~ stellar  
powers interested in  
these areas will  
develop as I can

vouch for the two  
 most concerned in  
 this galaxy, the  
 # Espinal United Stars  
 and the to which  
 the Solar System  
 distantly belongs  
 and the Galactic  
 Confederation to  
 which Espinal  
 moderately bows.

As not all living  
 things are capable of  
 attaining O.V. (the vast

(11)

bulk of <sup>any human</sup> population, like <sup>animals</sup> ~~are~~ <sup>possibly</sup> ~~probably~~ <sup>grass and trees,</sup> minor in <sup>origin</sup>. The task of rehabilitation is not as great as it looks.

This leaves us first and foremost with the problem faced by the budding D.V. What to do to square things around? I recommend that any action taken by

(12)  
Any O.T. on this planet  
be guided by the  
attached programme.

"An International  
Objective". Any  
public ambitions for  
us on Earth, any  
vengeful or destructive  
urges, any <sup>stunts</sup> or  
public actions should  
be channelled into  
accomplishing the  
attached programme.

Several C.V.'s even  
 if acting independently  
 could accomplish  
 this, ~~even making~~  
 errors. Further  
 the plan has some  
 chance of succeeding  
 even if driven in  
 ordinary ways such as  
 placing copies of it  
 in the various offices  
 of the United Nations,  
 putting it into newspapers,

(14)  
inviting the attention  
of large commercial  
interests to it, etc.

We could probably  
each one of us think  
of a plan for earth.  
Let us instead agree  
upon a feasible plan  
in which all of us can  
cooperate.

ANY PRECISE  
MOVING TOWARD O.T.  
SHOULD READ THIS POLICY

(15)

LEADER AND VNE  
PLAN. THE PUBLIC  
MAY BE SHOWN THIS  
PLAN AND IT MAY  
BE REPUBLISHED  
ANYWHERE. THIS  
POLICY LEADER  
HOWEVER MAY NOT  
BE MADE PUBLIC
