

Greetings!

We are proud to announce our support of the international effort to put LRH Tech on the internet.

For our first post to the newsgroups, we present to you the Organization Series lectures, in 20 parts.

These lectures contain Ron's early insights into how Scientology should be run. You will find the Cof\$ today at complete odds with the basics that he laid out in these lectures. Especially telling is Ron's empowerment of the individual, rather than the organization.

We scanned these from the transcripts of the 1989 Clearsound tape set titled "How To Present Scientology To The World". We do not have the original version.

To FZBA US: If you have access to the old reels, please check these for any RTC omissions.

ARC,

Director FZBA of Scandinavia

INTRODUCTION [by Cof\$]

The lectures you are about to hear were delivered by L. Ron Hubbard between 18 October and 13 December 1956 to the combined student bodies of the Washington, DC, Academy and the 15th Advanced Clinical Course, along with the staffs of the Washington organization and Silver Spring Distribution Center.

Ron had an extremely vital subject to address: how to present Scientology to the world. There was a particular importance in doing so at that time, just as there is today.

The world scene in 1956 could only be described as chaotic. Atomic testing in the Nevada desert and elsewhere was exposing thousands of servicemen and millions of people to radioactive fallout; Soviet tanks had invaded Hungary; Israel invaded the Sinai while French and British forces attacked Egypt over control of the Suez canal. The Cuban revolution was in its beginning stages.

"Scientology," Ron said then, "is doing very well across the world. If it were doing just a little bit better, there would be things not happening which are happening at this moment on the major scene of nations." He further stated that "Internationally the goal is to bring about a superior civilization in which peace can exist on earth. The modus operandi by which this is done is education in the actual simple facts of existence."

In this series of talks, Ron lays out the technology by which Scientologists™ can make Scientology better known and help to accomplish the purpose laid out above. The subjects he covers include the basic tenets and laws governing organizations, setting up and teaching introductory and advanced courses about Scientology, overcoming stage fright in addressing small or large groups, the step-by-step actions one can take to truly bring others to an understanding of Scientology, and much more.

These lectures were originally recorded in the new Academy premises of the Founding Church in Washington, DC, on equipment that is now long since obsolete. The most meticulous care and procedures have been used at all stages of production to restore the original recordings of these priceless lectures so they can be presented to you in Clearsound™ state-of-the-art sound technology.

It is our pleasure to do so now.

The Editors, 1989
